

# PIPEDREAM PUMP WORX MAX BOOST PRO FLOW

## User manual

### CONTROL

- 1) To turn on and off, press the middle "power" button for about 3 seconds. The LED will illuminate when the power is turned on.
- 2) The top button with the "scale" symbol is used for constant suction and pressure release. The LEDs light continuously green 0-2.9 PSI, yellow 3-5.8 PSI and red 5.9+ to indicate pump pressure.
- 3) The bottom button with the "wave" symbol is for automatic suction and pressure release.
- 4) A small hole on the top of the pump is used for manual pressure release.
- 5) The pump can also be filled with water for more intimate pleasures.

### MAINTENANCE

After each use, rinse the product with lukewarm water.

We also recommend using an [erotic cleaner](#), which also helps to remove microscopic dirt.

Simply spray the product, leave it on for about 1 minute and then dry with a towel or cloth that does not leak fibers.

### WATERPROOF

The product is **water resistant**, so maintenance is very easy.

The product can be splashed with water, but you **MUST NOT immerse it in water!**

Waterproof means that you could completely submerge the product in water and enjoy water play.

Due only to the water resistance of the product, this is not possible in this case.

### LUBRICATION

Use only [water-based lubricants](#). Other lubricating gels could damage the surface of the aid and it could become sticky.

### DRIVE AND CHARGING

The product is powered by an integrated Li-on battery, which is approximately half charged from the factory, but we recommend that you fully charge it before first use.

Charge the battery using the included USB cable, which can be plugged into a phone adapter, PC or powerbank. When charging, the LED flashes and when fully charged, the LED control lights up permanently.

### STORAGE

Store separately from other erotic aids in a dry and dark place.

### PACKAGING CONTENTS

In the package you will find a pump and magnetic USB cable for charging.
